

Muhammad Taha Manzoor

Is it possible to persuade private sector to fund the fundamental research more, especially the one that is more aligned with their goals and potentially easier for them to integrate into their current infrastructure? Will private sector be willing to do it? If not, what are the challenges to persuade them to put extra funds in the fundamental research?

Anonymous Attendee

Is there any discussion on setting solar or nuclear heat close to manufacturing plants and are there any policies to support the transport of heat?

Melanie Tetreault-Friend, Prof.

My question is for all speakers: There is a lot of renewed excitement for hydrogen at the moment. It seems whenever there is a new trendy technology, other technologies see a drop in interest and funding. What are the potential consequences in having variable funding resources over the next decade+ versus more distributed steady funding for a wider variety of candidate solutions?
